PROFILE

Full-Stack & Mobile Software Engineer with 2+ years of hands-on experience designing, architecting, and deploying production-grade cross-platform mobile and web applications using React Native, Expo, TypeScript, Next.js, and Node.js. Proven track record of owning end-to-end feature delivery, implementing offline-first mobile architectures, integrating payment systems, and optimizing application performance. Adept at leading component architecture, establishing engineering best practices, and mentoring junior developers within Agile remote environments.

TECHNICAL SKILLS

- **Mobile Engineering:** React Native, Expo, TypeScript, Offline-First Architecture, React Navigation, Camera/OCR Integrations, Local Storage, PDF Generation
- **Frontend:** React, Next.js, TypeScript, JavaScript, TailwindCSS, TanStack Query, Zustand, Axios, Component Architecture
- **Backend:** Node.js, Express.js, NestJS, RESTful APIs, Redis, System Architecture
- **Databases & Cloud:** MongoDB, PostgreSQL, Firebase, Supabase
- **Payments & Tools:** Paystack, Git/GitHub, Vercel, Netlify, Figma

PROFESSIONAL EXPERIENCE

Software Developer — Contract | Novtryx | Remote

Jan 2026 – Present

- Architected and deployed end-to-end production features for deCave, an event booking and venue management platform, utilizing Next.js, Express.js, MongoDB, Redis, and Paystack.
- Engineered core booking, venue management, and secure financial transaction workflows, successfully integrating Paystack payment processing for seamless customer checkouts.
- Collaborated with lead engineering leadership on API schema design, system architecture, and customer-facing web performance optimizations.
- Built and launched the official Novtryx corporate marketing application using Next.js and TailwindCSS, drastically enhancing brand visibility and web user experience.

Frontend Team Lead | Firsta Technologies | Remote

Oct 2023 – Jan 2024

- Led frontend development for Dropoud, a high-scale React and TypeScript web application, owning core UI architecture, code quality, and technical feature delivery.
- Refactored legacy UI components and data-fetching patterns into modular, reusable custom React hooks and design systems, improving overall code maintainability by 40%.
- Mentored and managed 3 frontend engineers through structured code reviews, sprint task breakdowns, and hands-on technical guidance.
- Partnered with product management and UI/UX designers to translate complex requirements into pixel-perfect, responsive, production-ready interfaces.
- Standardized component design patterns, TypeScript strictness, and Git workflow conventions across the development team to ensure release consistency.

Web Developer | Arvys Technologies | Remote

May 2022 – Aug 2023

- Developed core features for an enterprise Learning Management System (LMS) leveraging React, Node.js, and RESTful web services.
- Built reusable interface components and integrated complex backend endpoints for course management, user administration, and content delivery workflows.
- Diagnostics & Reliability: Identified and resolved critical frontend and API communication bugs across the software development lifecycle (SDLC), enhancing system stability.
- Facilitated internal developer onboarding and trained engineering interns on modern JavaScript, React design patterns, and standard frontend practices.

Frontend Developer Intern | Cyber Tech Team | Remote

Jan 2022 – May 2022

- Contributed to the complete frontend redesign and deployment of the company's web platform using modern frontend tools.
- Implemented mobile-responsive UI layouts, boosting cross-browser and cross-device consistency.
- Participated actively in team code reviews, bug fixes, and feature integrations.

EDUCATION

B.Sc. Computer Science — University of Calabar, Nigeria | 2020 – 2025
